

Starburst completes Trino, the fastest and most efficient open-source MPP SQL distributed query engine for the data warehouse, data lake, and data mesh, with enterprise-ready performance, security, and connectivity

Data Lakehouse

Warehouse capabilities, without the warehouse

Query Federation

Analytics on all your data, wherever it lives

Embedded Engine

Bring the power of insight to any application

Data Products

A domain-driven approach to data democratization

ELT Data Processing

Configurable data pipelines using ANSI SQL

Starburst Enterprise Deploy anywhere

Enterprise-grade software backed by professional support and services

Run lightning-fast queries across sources, with high concurrency.

Fine-grained security ensures your data is in the right hands

Supported by the largest team of Trino experts in the world.

50+

Supported Connectors

Partner ecosystem that enables customers to access their data wherever and however they may need

Available via all major marketplaces

Starburst Stargate

Cross-cloud and ground-cloud access to any region without data movement

Single point of access to all data

Data lakes

Data warehouses

RDBMS

Non-relational DBs

Streaming data

Starburst Galaxy Built for the cloud

Fully managed cloud data lake analytics built and supported by the creators of Trino

Data lake analytics in minutes

One engine for long-running and interactive workloads

Manage security with role based access control

Create real business value with the power of insight

90%

Faster time to insight

53%

Lower TCO

2%

New revenue potential

90%

of all Trino code commits
